Where are Georgia Power's new battery energy storage systems located?

Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, Lowndes, Floyd and Cherokee counties.

Does Georgia Power support Customer-Sited solar?

Georgia Power is also committed to supporting customer-sited generation resources to meet the state's growing energy needs. The 2025 IRP includes two customer expansions of BESS programs including enhancements to the Customer Connected Solar Program and launching a new Customer-Sited Solar Plus Storage Pilot.

How many MW of new battery energy storage will be available?

An additional 1,000 MW of new battery energy storage is expected to be procured in the coming years through competitive bidding processes and a 13 MW demonstration project is in development at Fort Stewart Army Installation near Savannah, Georgia.

Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, ...

Since new clean energy investments were passed in 2022, America's clean energy sector has kicked into high gear, transforming Georgia into a solar and electric vehicle battery manufacturing powerhouse.

Georgia Power has requested certification from the Georgia Public Service Commission (PSC) for 9,900MW of new generation resources, including more than 3GW of battery storage that ...

Learn more about the Southwest Atlanta Energy Storage, an innovative solar project and capital investment proposed for Fulton County, Georgia.

Georgia Power has requested state energy regulators to approve nearly 10,000 megawatts of new energy resources, including a mix of gas turbines, solar, and battery storage ...

Georgia Power is constructing several new battery energy storage systems to support energy capacity needs.
