In year 2009 in United States, around 322 MW of college campus was lit up by microgrids and by 2015 \$2.76 billion of investment was made to develop around 940 MW through microgrids.

This white paper focuses on tools that support design, planning and operation of microgrids (or aggregations of microgrids) for multiple needs and stakeholders (e.g., utilities, developers, ...

This project investigates the use of domestic DC loads in the Qingdao area, proposes a PV-based design of a domestic DC microgrid with local solar resources, and conducts practical tests on the ...

This paper evaluates the design and optimization of an islanded hybrid microgrid for various load dispatch strategies by assessing the optimal sizing of each component, the ...

From MIT to Stanford, engineering students are transforming their graduation projects into real-world solutions for renewable energy integration. Just last month, a team from TU Delft actually ...

I'm pleased to share that we've successfully completed our graduation project at Taif University titled: "Hybrid Energy System Optimization Using Solar Power and Hydrogen."

Explore innovative microgrid project ideas for electrical engineering students. Learn about renewable integration, energy management, smart grids, islanded and grid-connected ...

Graduation report on the research and development of machine learning-based electrical usage forecaster for microgrids. Details my process of conceptualising and designing the application.
