Will Saint John energy certify its energy supply?

That will allow both Saint John Energy and the City of Saint John to certify all their corporate electricity supply as being from renewable energy while still leaving an abundant supply for others in the city looking for green electricity.

Who is Saint John energy?

As Saint John's premier provider of excellence in energy solutions, we serve 36,500 residential, commercial and industrial customers. Our reliable service exceeds industry standards at rates that are among the lowest in the region.

How long will Saint John energy receive energy from Burchill?

Under its agreement with Natural Forces, Saint John Energy will receive all the energy produced from Burchill for at least 25 years as well as the RECs associated with the electricity the wind farm generates.

What is Saint John energy zero30?

Plug in! Saint John Energy is on a bold path to net-zero emissions by 2030. Zero30 is our roadmap to get there. Our roadmap to building a sustainable and prosperous future relies on three main pillars. Zero30 will identify the optimal mix of renewable energy, grid modernization, energy storage, and smart energy products to get us to net zero.

From wind and solar to battery storage, compressed air storage, green hydrogen, and ammonia, we are advancing a green power mix that addresses production, energy and price efficiency.

Today's investments will help make home retrofits more affordable and accessible in St. John's--helping homeowners cut energy bills, reduce emissions, and improve living spaces.

We're ready to play a bigger role in Saint John's future. Our customers are looking for products and services that help them use energy more efficiently and that comes from cleaner and more ...

It covers your awareness of the Zero30 initiative, thoughts on financial incentives and energy efficiency programs, concerns about future electricity demand, the sustainable changes ...
