---

A consortium of five Vietnamese and international companies has proposed a major investment in an energy storage battery manufacturing facility in Ho Chi Minh City's Saigon High-Tech Park (SHTP), ...

The National Energy Administration and related ministries emphasized innovation in flow batteries, compressed air, sodium-ion, and other storage technologies, aiming to achieve 180 GW of ...

On October 3rd, the highly anticipated candidates for the winning bid of the all vanadium liquid flow battery energy storage system were announced. Five companies, including Dalian Rongke, Weilide, ...

Project Background: VRB Energy aims to construct the first fully integrated Vanadium Commodity and Vanadium Redox Flow Battery (VRFB) energy storage manufacturing plant in Vietnam.

The Vietnam All-Vanadium Redox Flow Battery (VRFB) Electrolyte Market is gaining strong momentum due to the growing need for scalable and long-duration energy storage solutions.

We will develop different flow battery lines based on available raw materials to improve competitiveness and reduce costs. In essence, the materials used to design storage batteries will be based on ...

The flow-battery sector has met with a number of false dawns before. This time, developers and producers say, the technology is ready.

China's first megawatt iron-chromium flow battery energy storage demonstration project, which can store 6,000 kWh of electricity for 6 hours, was successfully tested and was approved for ...
