Small wind turbines no longer worth it? I've gone through two 1kw wind turbines (African wind power and a e300 Kestrel) and both have failed after only 2-3 years of use.

Crucially, they work when the sun isn't out. That doesn't mean they work in every situation. My land mates and I would dearly like to install wind turbines on our off-grid property, but ...

In this video I'll take you through the science and engineering reasons why rooftop solar is much easier than small wind, and show that the same wind turbine on a roof is likely to generate...

Boost renewable energy success with expert wind turbine tips, optimizing wind power efficiency, turbine maintenance, and renewable energy systems for sustainable energy solutions and ...

One Reddit user raised a question about the climate impact of wind turbines -- and others had the answers.

Whether you're a wind fanatic or just want to weigh all your options to reduce your electric bill with clean power, read on to learn if, when, and how a small wind turbine could make sense to ...

So I'd like to install a vertical turbine to back-up the solar cells. However, it seems Redditors in the sub have a very low opinion of Tesup and the various Chinese alternatives.

I wonder if anyone has positive experience with using small wind turbine for domestic purposes. My home has got flat roof above the garage located in the way that I can feel the wind is ...
