---

The company has successfully built the entire upstream industrial chain of hydrogen energy manufacturing and storage, and its hydrogen energy production capacity has been ...

On June 12, 2019, Hongda Industrial and Youyan Engineering Technology Research Institute Co., Ltd. signed the "Rare Earth Hydrogen Storage Material Development Cooperation Agreement."

Hongda Xingye said that rare earth products have a wide market demand, and the rare earth industry has a good development prospect in China. Baotou Xindamao rare Earth Co., Ltd. is a holding ...

Hongda Industrial Co., Ltd. has always adhered to the development concept of circular economy and has a complete industrial system of "hydrogen energy, new materials, environmental ...

According to reports, Hongda Industrial takes advantage of the technology and experience advantages of the hydrogen production link to focus on the development of hydrogen ...

This cooperation will help Guangzhou-based chemical producer Hongda Xingye build an industry chain from production of hydrogen to its storage, transport and application, it announced yesterday.

China's Hydrogen Storage Company pioneers solid-state hydrogen storage technology, leveraging rare earths to transform clean energy markets and challenge global competitors.

This research reviews advancements from 2016 to 2024 in rare earth-based nanomaterials, focusing on doping, heterojunctions and composites for energy conversion and ...
