Explore the Trina Solar 455W Silver Frame photovoltaic module, engineered for high efficiency and durability, ideal for both residential and commercial solar solutions.

New in 2022, the Vertex S+ is Trina's first N-Type panel. With a Dual-glass design, the S+ offers high reliability to harsh conditions and better light trapping for high power outage.

The TRINA SOLAR 455W NEG9R.28 BF features a half-cut cell design that enhances energy conversion efficiency and reduces power loss. Its monocrystalline solar cells are encapsulated in ...

With a peak power of 455W and module efficiency exceeding 22%, this panel is ideal for installations where space is limited but energy demand is high. It is fully compatible with modern inverters, ...

Featuring half-cut cell technology, this panel maximizes power generation while reducing losses caused by shading and resistance. Its robust design and advanced materials ensure long-term durability and ...

Specifications included in this datasheet are subject to change without notice. The right of final interpretation belongs to Trina Solar Co.,Ltd. STC: Irradiance 1000W/m<sup>2</sup>, Cell Temperature 25°C, ...

The Trina Solar Vertex S+ Dual Glass is based on N-type i-TOPCon cell technology. Dual-glass improves durability, fire resistance, and performance. The panel delivers 455W output power and ...
