HJ-SG Solar Container provides reliable off-grid power for remote telecom base stations with solar, battery storage and backup diesel in one plug-and-play solution.

Cellcom and Parallel Wireless announced the launch of their first-of-a-kind pilot, which will demonstrate the deployment of autonomous 5G SA core sites in Israel.

The Ministry set incentive conditions in a tender, by which the communications companies had to establish and operate 250 sites at 3800-3500 MHz for 5G and a minimum bandwidth of 60 MHz in a ...

This report delves into the dynamic landscape of 5G and emerging 5.5G base stations, offering a detailed analysis of market concentration, key trends, regional dominance,

There is currently no deployment of 5G transmitters - the tender for the allocation of 5G frequencies has not yet been finalized. The Ministry has not issued licenses nor allocated ...

A significant number of 5G base stations (gNBs) and their backup energy storage systems (BESSs) are redundantly configured, possessing surplus capacity during non-peak traffic hours.

It thus appears as though Israel has joined the list of countries in which the technology is available, but in practice there's a long way to go.

While other nations in the European region are operating fibre optic networks, Israel relies on infrastructure rolled out before 2010, which presents consequences for the capacity of data trafficking ...
