According to data from the Federal Energy Regulatory Commission (FERC), wind energy accounted for 30.1% of the new electricity capacity added in January 2025, and as the most-used renewable ...

In 2025, we expect 7.7 GW of wind capacity to be added to the U.S. grid. Last year, only 5.1 GW was added, the smallest wind capacity addition since 2014. Texas, Wyoming, and Massachusetts will ...

By the end of 2025, global cumulative wind capacity is projected to exceed 1"320 GW, sufficient to generate around 12% of the world"s electricity. Country Highlights.

Compared with 2019-2024, our forecast expects cumulative onshore wind capacity additions to increase 45% over 2025-2030, reaching 732 GW.

The US Department of Energy"s EIA forecasts 32.5 GW (AC) of utility-scale solar capacity and just over 18 GW of energy storage will be deployed in 2025. The agency also expects 7.7 GW of...

Amid a challenging market environment, the report shows that the US is on track to add 46 GW of new wind capacity from 2025 to 2029, with total projected volumes unchanged quarter-on ...

Wind Energy At the start of the year, we identified the need for continued investment in onshore and offshore wind, which have long driven renewable energy growth. In 2024, global wind capacity ...

In 2025, we expect 7.7 GW of wind capacity to be added to the U.S. grid. Last year, only 5.1 GW was added, the smallest wind capacity addition since 2014. Texas, Wyoming, and ...
