How much does a solar battery cost?

A fully-installed 13.5 kWh solar battery costs \$13,500 on average, after claiming the 30% tax credit. This price can vary from project to project as there are many factors that influence battery storage costs. Update: The homeowner-claimed tax credit for home battery storage is only available until the end of 2025.

How much does a solar backup battery cost?

Many of the best home solar backup batteries will cost somewhere between \$12,000 and \$20,000, but the total cost will vary depending on the battery you choose and the difficulty of the installation. The price of a Tesla Powerwall is usually much lower than other battery brands, but it will depend on the installer you choose.

Can solar panels and batteries save money in California?

Pro tip: In California, homeowners combining solar panels and batteries can save up to \$10,000 with SGIP and federal incentives together. The type of battery you choose impacts both the upfront cost and long-term value. Here's a 2025 comparison by chemistry:

Do solar panels have storage batteries?
