Can you lease solar panels?

Leasing solar panels is like leasing a car: you don't own the solar panels, but you do get to use the solar energy they produce for a fixed monthly payment to the solar company. Solar lease payments are typically designed to be lower than your pre-solar electricity bill, so you'll still see savings every month.

How do I get affordable solar panels?

There are two main ways homeowners can get affordable solar panels -- by signing a solar panel lease, or pursuing a Power Purchase Agreements (PPA). The primary differences between them are: Lease: You pay to lease the solar equipment or for the power produced. PPA: You ultimately have the option to purchase your solar panel system.

What is the difference between a PPA and a Lease Solar System?

The primary differences between them are: Lease: You pay to lease the solar equipment or for the power produced. PPA: You ultimately have the option to purchase your solar panel system. Of course, nothing in life is completely free.

Should you buy a solar system with a PPA?

You'll also have the option to purchase the solar system at predetermined times throughout the lease term. Similar to a traditional solar panel lease, the benefit of a PPA is that the solar company that installs and maintains your system handles most or all of the upfront costs and logistics.

Discover the costs of leasing solar panels and how it compares to other financing options. Learn about monthly fees, upfront costs, potential savings, and benefits like maintenance coverage.
