What is advanced rocketry in Minecraft?

Advanced Rocketry is a Minecraft mod designed to add random or player specified planets to the game. These planets each have unique properties such as Atmosphere Density, Distance from the sun, Atmosphere composition, Average Temperature, and size. Players can build rockets out of blocks to travel to these other worlds.

How does the advanced solar generator work?

The Advanced Solar Generator has a small internal buffer of 80,000 RF so use of an energy storage cell is strongly recommended. The produced energy can be fed into a power grid (e.g. via Basic Universal Cable), or it can be stored into portable storage items (e.g. Basic Energy Cube or RE-Battery) inside the GUI.

What is advanced rocketry?

About: Advanced Rocketry is a mod about exploration and exploitation of other worlds and planets: Mine and explore planets and moons within solar systems and travel to them via your own custom built rockets rockets and warp ships. Build space stations and look down on any planet from above. Build custom rockets where your choices of parts matter.

What is advanced solar generator?

The Advanced Solar Generator is a block added by Mekanism. It produces approximately 120 RF/t during daylight hours. It can be used standalone or as a component in crafting the Solar Evaporation Plant. The Advanced Solar Generator has a small internal buffer of 80,000 RF so use of an energy...
