Will Huawei's battery energy storage system be discontinued in Britain?

Exclusive Huawei's product portfolio in Britain is about to shrink again with suppliers informed that its battery energy storage systems (BESS) are to be discontinued locally by the end of 2025.

Who funded Highview Power's Liquid air storage plant in Manchester?

UK scaleup Highview Power has secured  $\pounds 300$ m to build a liquid air storage plant in Manchester. The UK government's Infrastructure Bank led the funding round. Investment bank Goldman Sachs, British energy firm Centrica, and mining giant Rio Tinto also took part.

What is Highview Power's Energy Storage Project?

Highview Power is creating the largest energy storage facility of its kind, which will store surplus electricity from wind and solar farms. The two-stage Hunterston project is supporting 1,000 jobs on site during construction and 650 jobs in the supply chain.

Can Highview Power store energy longer than current batteries?

Highview says its plant can store energy for longer than current batteries could. It plans to develop a network of storage plants across the UK, starting in Carrington, to provide a stable supply of green energy to the National Grid. Richard Butland, co-Founder & CEO of Highview Power said: "There is no energy transition without storage.

Work has begun on a  $\pounds 300$ m energy plant which will store surplus electricity from wind and solar farms in the form of liquid air. The facility at Carrington near Manchester, designed by ...

Highview Power is not stopping at Manchester; the company has ambitious plans to construct four more large-scale facilities, each with a capacity of 2.5 GWh, at strategic locations ...

Highview Power has announced it has secured investment from energy giant Centrica and the UK Infrastructure Bank to build the first commercial-scale liquid air energy storage (LAES) ...

UK scaleup Highview Power has secured  $\pounds 300$ m to build a liquid air storage plant in Manchester. The UK government's Infrastructure Bank led the funding round.

Highview's liquid air energy storage system captures excess renewable energy when demand is low, and stores it as liquid air, for hours, days, or even weeks. When it is needed, the air ...
