-----

Solar photovoltaic bracket forming machine is used to produce brackets related to the electrical industry, and the finished product is a multifunctional application of lap bracket.

The Solar Photovoltaic Bracket Roll Forming Machine is a specialized industrial equipment designed to produce high-precision metal brackets for solar panel installations.

Under three typical working conditions, the maximum stress of the PV bracket was 103.93 MPa, and the safety factor was 2.98, which met the strength requirements; the hinge joint of 2 rows ...

Quality Oriented, Technology Innovation is our core concept. Each component of our machines is examined and qualified before assembling; each set of our equipment is fully test run before delivery. ...

Through manual adjustment or replacement of different roller sets, it enables seamless production of brackets in various specifications on a single solar mounting strut channel production line.

The servo feeding system guarantees accurate length control, while hydraulic cutting ensures clean, burr-free edges. Suitable for galvanized steel, aluminum, and stainless steel, the machine delivers ...

The Photovoltaic (PV) Bracket Production Line is a fully automated solution designed for the mass production of solar mounting structures (solar struts/channels).

After years of study and after having gained specialized experience in the field with over 5,000 customers for whom we have produced more than 100,000 brackets, our technicians have ...
