The report is a comprehensive overview of energy storage system projects across the country, detailing the status of installations, key states for capacity development, tariff trends, the ...

India's energy storage projects installation to surge 10-fold to 5GWh in 2026: IESA Key takeaways from Budget 2026-2027

India's Adani Group has made its first entry into the battery storage market, announcing a "flagship deployment" that will be the country's largest project so far when completed.

The report indicates that Battery Energy Storage Systems (BESS) and Pumped Storage Projects (PSP) will form the backbone of this energy storage expansion. BESS capacity is expected ...

The report, Strategic Pathways for Energy Storage in India Through 2032, tackles these questions. With its sharp analysis and data-driven approach, it maps out practical, affordable ways to roll out storage, ...

Record-low bids to build battery energy storage systems in India have sparked fears that some projects could be economically unviable and even pose safety risks, industry experts and...

India's battery energy storage capacity is set to rise nearly ten-fold to around 5 GWh in 2026 from 507 MWh in 2025, reflecting a shift from tendering to execution of projects.

Between 2022 and May 2025, India auctioned approximately 12.8GWh of battery energy storage system (BESS) capacity for both hybrid and standalone applications. However, only about ...
