-----

Following Electra, the fast-charging joint venture Ionity now also provides access in Europe to the charging stations of ChargeLeague members Fastned, Electra, and Atlante. However, ...

That's not bad as far as Europe is concerned and actually significantly better than in the case of IONITY, which recently launched a new tariff - Ionity Passport: Tesla prices are better in...

In the quest to stay powered up, two major players in the EV charging landscape are Tesla's Supercharger network and Ionity, a pan-European fast charging network. In this article, I'll ...

ChargeLeague is a unique collaboration between leading European fast-charging companies Atlante, Electra, Fastned and IONITY. These four companies have joined forces to create Europe's largest ...

Fastned is extensive in Netherlands, so much so that you barely need to plan. Also quite a few in Belgium and Northern Germany. Seem to be a mix of 170kW and 300kW installations in ...

Fastned, as a prominent player in the European fast-charging market, faces competition from several other companies operating in the same space. Here are some notable names: Ionity: ...

IONITY, known for its pan-European ultra-fast charging network, operates 130 CPs in the Netherlands with 45 MW of power. Their growth rate of +44% reflects strong confidence in the Dutch ...

The CEOs of Atlante, Electra, Fastned and IONITY - all major European "pure-player" companies dedicated to EV charging - confirmed the first of its kind collaboration on April 02, 2025, at the Cercle ...
