Can a landholding executive agency lease a rooftop space?

Lease form a landholding executive agency may use for leasing rooftop space on an historic federal building to a private sector wireless telecommunication carrier for an antenna installation. GSA Master Revocable Antenna Historic License [DOCX - 34 KB]

Can a landholding executive agency lease land to a wireless telecommunication carrier?

Lease form a landholding executive agency may use for leasing developed federal land to a private sector wireless telecommunication carrier for an antenna tower installation. Pursuant to the MOBILE NOW Act, applicants for the grant of a right-of-way or easement shall be charged a fee based upon direct cost recovery.

What databases does the Commission maintain?

The Commission maintains two databases, the E-106 system and the Tower Construction Notification System (TCNS), to facilitate communications with these parties.

Where should cell base stations be located?

An analysis of 100 studies published in Environmental Reviews found approximately 80% showed biological effects near towers. "As a general guideline, cell base stations should not be located less than 1500 ft from the population, and at a height of about 150 ft" (Levitt 2010).

Building new towers or collocating antennas on existing structures requires compliance with the Commission's rules for environmental review.
