---

At the launch event, Xu Jinmei, CTO of CATL's energy storage business unit, said that the company has been involved in 0-attenuation long-life battery technology for a long time, ...

An industry insider said that the product poses a technological advantage as there are not many mass-produced energy storage products available on the market that can reach five MWh in ...

Featuring all-round safety, five-year zero degradation and a robust 6.25 MWh capacity, TENER will accelerate large-scale adoption of new energy storage technologies as well as the high ...

To sum up, the TENER energy storage system has the characteristics of 4-dimensional true safety, zero attenuation for 5 years, and 6MWh level. The energy density per unit area is increased by 30%, the ...

Moreover, ensuring safety in energy storage systems remains a paramount concern, with unplanned shutdowns due to critical equipment issues being a prevalent issue. Despite the ...

CATL's Tianheng energy storage system integrates "zero decay in five years, 6.25 MWh, and multi-dimensional true safety", pressing the accelerator button for the large-scale application and ...

CATL's launch of Tianheng represents not only an impressive leap forward in energy storage technology but also signals a trend towards longer-lasting, safer, and more cost-efficient ...

CATL has made a breakthrough in promoting the high-quality development of the energy storage industry with its zero-attenuation, high-energy and truly safe energy storage system.
