What is the solar energy industry?

The solar energy industry builds and installs devices to capture energy from the sun and convert it into electric power. Companies in the industry are working to transition the global economy from fossil fuels such as oil and natural gas to renewable energy sources.

Is solar energy booming in the United States?

Solar energy in the United States is booming. Along with our partners at Wood Mackenzie Power & Renewables, SEIA tracks trends and trajectories in the solar industry that demonstrate the diverse and sustained growth of solar across the country. Below you will find charts and information summarizing the state of solar in the U.S.

Why should you invest in solar energy?

Millions of Americans are deciding to power their homes with solar energy--especially as costs have decreased--but an investment in solar energy generates more than just clean energy. It can support household savings, energy independence, economic opportunities, grid reliability, resilience, security and affordability, and a safer planet.

Should you invest in solar energy stocks?

Many companies focus on solar energy and should benefit from the sector's growth. However, not all have strategies designed to enhance value for their shareholders. Three solar energy stocks that stand out as the most worthy of investors' consideration are: Data as of Jan 26, 2026. Showing 5 of 5 tickers.
