---

Solar control glass reduces heat gain by filtering infrared rays while maintaining high visible light transmission, making it ideal for energy-efficient curtain walls.

We are pioneers in integrating personalized photovoltaic glass into the very fabric of your curtain wall, marrying aesthetic elegance with unparalleled energy efficiency.

Made with infinitely recyclable, low-carbon footprint glass, Lumyra facades achieve an Energy Payback Time (EPBT) of only 0.8-2 years, compared to 4 years for traditional panels.

Traditionally used to cover building structures, our opaque spandrel photovoltaic glass delivers superior energy efficiency with high solar energy yield, thanks to its dense solar cell integration.

Transparent photovoltaic glass curtain wall is an innovative product that combines solar power generation technology with building curtain walls. It is composed of transparent glass modules and ...

Photovoltaic (PV) curtain walls integrate cadmium telluride (CdTe) solar cells into laminate glass to create energy-generating surfaces. PV curtain wall systems consist of semi-transparent PV glass ...

Both amorphous silicon and crystalline silicon glass can be used for curtain wall applications, and choosing one will depend on your design preferences, energy needs, and sunlight conditions. The ...

BIPV (Building-Integrated Photovoltaic) solar glass curtain walls combine energy generation with architectural aesthetics, ideal for modern building exteriors. They offer efficient power generation, ...
