The laboratory has two independent cavitation units of different performance with all the necessary technological equipment, including pumps, pipelines, heat recovery units, storage tanks and ...

DTEK Group, together with the U.S. company Fluence, a global leader in energy storage, commissioned 200 MW of capacity with a total storage volume of 400 MWh. The new facilities, ...

Ukraine's largest private energy company DTEK will buy storage systems with total capacity of 200 megawatts from a unit of renewable energy storage provider Fluence Energy to ...

Imagine storing energy in underwater air tanks--like a submarine sandwich of power generation. With EU funding pouring in and tech partnerships forming, Ukraine's energy storage ...

From our origins as a thermal power producer, DTEK is today transforming into a sustainable and resilient energy leader for Ukraine and Europe. Starting life in eastern Ukraine, DTEK's operations ...

DTEK company, together with American Fluence, have completed the construction of the largest energy storage system (BESS) in Eastern Europe, which will provide Ukrainians with stable ...

From salt caves to AI-powered turbines, Ukrainian air energy storage equipment isn't just keeping the lights on--it's rewriting the rules of renewable energy storage.

Commissioning these energy storage systems represents a new level of security and flexibility for the power system, ensuring reliable electricity supply to millions of Ukrainians and industry.
