Here is a list of the largest planned solar projects in development in the US --ranked by planned capacity in megawatts. These projects are expected to come online in the coming years.

Learn more about the new U.S. Large-Scale Solar Photovoltaic Database Deciding where solar projects will be installed is one of the very first decisions to be made in a project development timeline. While ...

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.

The 2.7GW Westlands Solar Park, one of the world's largest solar power plants, is being developed in the San Joaquin Valley in California, US. CIM Group in collaboration with Westside ...

The U.S. Large-Scale Solar Photovoltaic Database provides the locations and array boundaries of U.S. photovoltaic facilities, with capacity of 1 megawatt or more.

By 2015, Solar Star was declared the world's largest solar farm with regards to its installed capacity, as mentioned earlier that it makes use of 1.7 million solar panels that spread over 3200 acres of land.

Talatan Solar Park (in Gonghe County, Qinghai, China) is the largest solar park in the world with a capacity of 16,000MW as of 2023 and a planning area of 609 km², which is close to the land area of ...

The project is a large-scale solar energy initiative developed on 10,000 acres of land north of the city of London near Plumwood in Madison County. The project is expected to have a maximum ...
