Can solar panels cause a roof to leak?

The installation of solar panels on your roof can be an exciting time as it means you will be cutting down your energy costs considerably, but doing this will involve drilling holes in your roof, which could beg the question of whether this will cause your roof to leak? There are various reasons your roof could leak after installing solar panels.

Is it the solar panels that are leaking?

If solar panels are not ideally suited for your roof, poor installation tactics can make your roof leak. Roofs made from wood shingles, clay, slate, and terracotta tiles are particularly vulnerable to leaks and damage during installation.

How do you fix a roof leak under solar panels?

To fix a roof leak, identify the source, repair the roof, inspect and upgrade the mounting system, and reinstall and seal the solar panels properly. Improper installation practices and pre-existing roof issues are the primary culprits behind roof leaks under solar panels. Let's delve into each cause: 1. Poor Installation Practices

Can solar panels protect your roof from water leaks?

While solar panels can protect your roofs, if you install the solar panels when the roofs are in bad shape, you would end up in more trouble. While the panels won't protect the roof from the leak, it would be tough for you to revamp your roof after installing the solar panels. How to identify and fix the solar water leaks on the roof?
