What caused Libya's fiber-optic cable outage?

The outage was caused by fiber-optic cables being severed Tuesday, Libya's state-owned telecommunications company said. Engineers were investigating to determine whether it happened because of digging for bodies or was sabotage, the company's spokesman, Mohamed al-Bdairi, told a local television station.

How many people have been displaced in Libya?

Government officials and aid agencies have given varied death tolls ranging from about 4,000 to over 11,000. At least 40,000 people were displaced in the area, including 30,000 in Derna, according to the U.N.'s migration agency. Many people have moved to other cities across Libya, hosted by local communities or sheltered in schools.

What did Libya's chief prosecutor say about 'serious measures'?

The country's chief prosecutor, meanwhile, vowed to take "serious measures" to deliver justice for the victims of the floods, which killed thousands of people and devastated the coastal city of Derna more than a week ago. The outage was caused by fiber-optic cables being severed Tuesday, Libya's state-owned telecommunications company said.

What triggered deadly flooding in Libya?

Heavy rains triggered deadly flooding across eastern Libya earlier this month. The storm overwhelmed two dams in the first hours of Sept. 11, sending a wall of water several meters high through the center of Derna, destroying entire neighborhoods and sweeping people out to sea.

Libyan authorities have recently intensified their efforts to control the information flow in the country, through a series of internet and communication shutdowns. These blackouts are used to ...
