Utilizing Tier 1 LFP battery cells, each battery cabinet is designed for an install friendly plug-and-play commissioning with easier maintenance capabilities. Each outdoor cabinet is IP56 constructed in a ...

Featuring liquid-cooling DC battery cabinet, this system excels in performance and efficiency. Its design optimization slashes lead time by 50% compared to traditional Battery Energy Storage System ...

The liquid cooling system ensures higher system efficiency and cell cycling up to 10,000 cycles. The liquid cooling system reduces system energy consumption by 20% and extends battery life by 10%.

With advanced liquid cooling technology, our systems effectively manage battery temperatures, ensuring stable performance under high loads and enhancing efficiency and lifespan.

Ranging from 208kWh to 418kWh, each BESS cabinet features liquid cooling for precise temperature control, integrated fire protection, modular BMS architecture, and long-lifespan lithium iron phosphate ...

Featuring liquid-cooling DC battery cabinet, this system excels in performance ...

The liquid cooling system conveys the low temperature coolant to the cold plate of the battery through the water pump to absorb the heat of the energy storage battery during the charging/discharging ...

EFFICIENT AND DURABLE Industry leading LFP cell technology up to 10,000 cycles with high thermal stability Liquid cooling capable for better efficiency and extended battery life cycle Higher energy ...
