-----

Compared to the mainstream brackets on the market today, the service life of bamboo poles seems to be rare. Let it and the component have a life span of 25 years or even 30 years, it is ...

This study focuses on the development and testing of a bamboo-based solar garden light product, utilizing Bambusa Balcooa, one of the sixteen bamboo species recognized by the National...

A bamboo-based BPV model is a novel technique for capturing solar energy that uses bamboo as a crucial component. This concept works by using BPV principles with bamboo's unique ...

India's first bamboo-based biorefinery, which converts bamboo into bioethanol, was commissioned in Assam, proving the country's commitment to this renewable resource.

We use a simple surface self-assembly technique to load polypyrrole (PPy) onto bamboo to make solar evaporation devices. All the advantages of the PPy-bamboo solar evaporation device ...

Pairing power poles with EcoFlow solar panels creates a unique electricity solution when working on an outdoor project on unoccupied property without access to the grid.

By harnessing the strength and eco-friendly properties of bamboo, the solar industry is not only reducing its reliance on traditional materials but also paving the way for a more environmentally conscious and ...

Constructed from bamboo and designed for off-grid living, the structure employs solar panels and a rainwater collection system to provide sustainable housing solutions for urban residents.
