Developed by Globeleq in partnership with Malindi Solar Group, it consists of 157,000 solar panels and is the only utility-scale renewable power plant in Kenya's coastal region.

In February 2024, Kenyan media reported that Globeleq had received authorization from the Kenyan Energy and Petroleum Regulatory Authority (Epra) to invest KSh4.6 billion (US\$29 million) in a ...

UK-based power firm Globeleq has received approval to set up a battery storage system for its Malindi solar plant to optimize the utilization of renewable energy.

Construction on the project began in 2019 and was completed in 2021. The plant has been generating clean electricity since mid-December 2021 and selling it to national utility Kenya Power and Lighting ...

Under President William Ruto's leadership, the Malindi Solar Power Plant has achieved operational stability and is now poised for major expansion. Speaking after assessing the facility, ...

Its output is planned to be sold directly to the Kenya Power and Lighting Company for integration into the national grid. It is expected most of the power generated will be consumed locally, in an area with ...

Malindi solar farm is an operating solar photovoltaic (PV) farm in Kilifi County, Kenya.

Malindi Solar PV Park is a ground-mounted solar project which is spread over an area of 651 acres. The project supplies enough clean energy to power 250,000 households, offsetting ...
