Why should Maseru use a green system?

Using a new Green System as the foundation for future development means Maseru's green and blue (watercourses and waterbodies) assets are truly acknowledged and conserved during the planning and implementation of developments.

What is the Green System conceptual master plan (gscmp) for Maseru?

The Green System Conceptual Master Plan (GSCMP) for Maseru forms one component of the larger Maseru 2050 Urban Plan. The report comprises information, guidelines and proposals from various sources, agencies and organisations that can be used for the background, planning, implementation, and management and maintenance of a GSCMP in Maseru, Lesotho.

What is Maseru City Plan 2050?

The 2050 goal for the Maseru city plan started in 2017 with the aim of revamping Maseru in line with promoting SDGs which show that there will be a green system that turns to benefit Basotho as there will be improved management of natural resources through rehabilitation of wetland, river trail and restoration of deteriorating landscapes.
