---

Future wind and solar energy projects in Mexico will be required to colocate battery energy storage systems equivalent to 30% of their capacity, a senior government official told the ...

Solutions that combine generation with flexibility -- through storage and intelligent control -- are becoming essential for companies seeking operational certainty in an increasingly constrained grid ...

In October, Spanish energy company Iberdrola announced plans to move ahead with two solar projects totaling 535 MW in Mexico, marking a renewed commitment to the country's energy ...

State-owned utility CFE is constructing a 190MW battery storage unit co-located with a 1GW solar PV project, which is due for completion in 2028 (Energy Storage News, 2023).

Mexico is seeing a surge of large-scale solar and battery storage proposals across multiple states following an October decree that sets clearer rules for private energy investments.

Phase III of the project will add 300 MW of solar PV capacity and 90 MW of battery energy storage with a three-hour duration, with an estimated investment of MXN 6.49 billion. ...

Mexico is experiencing a rapid acceleration in large-scale solar and energy-storage proposals, following the government's rollout of a new decree in mid-October that more tightly ...

Thanks to the country's geographical conditions, Mexico has great potential for solar and wind energy, which makes it an ideal candidate for the implementation of energy storage systems to ...
