High-efficiency Mobile Solar PV Container with foldable solar panels, advanced lithium battery storage (100-500kWh) and smart energy management. Ideal for remote areas, emergency ...

Our containerized and trailer-mounted lithium battery systems are built to replace diesel generators with zero-emission, high-capacity electric power.

These rugged, self-contained systems integrate large solar arrays, advanced battery storage, and high-capacity fuel cells -- with optional diesel redundancy when regulatory or client requirements demand it.

Offering flexible capacity from 100kW to 250kW, it provides complete energy autonomy for mining camps, factories, and island resorts where the grid is unstable. Engineered for extreme ...

These Energy Storage Systems are a perfect fit for applications with a high energy demand and variable load profiles, as they successfully cover both low loads and peaks.

That's the rockstar potential of 10MW mobile energy storage - energy systems you can literally drive to disaster zones, construction sites, or anywhere electrons are needed ...

Emerging markets in Africa and Latin America are adopting mobile container solutions for rapid electrification, with typical payback periods of 3-5 years. Major projects now deploy clusters of 20+ ...

From foldable solar containers to mobile BESS trailers, we provide reliable power for mining, construction, and remote camps. Customizable PV+Storage+Diesel configurations available.
