Using radio frequency magnetron sputter deposition to apply metal oxide thin film as a hole transporting layer (HTL) onto a halide perovskite layer significantly compromises the device ...

(Yicai) Jan. 3 -- Chinese new energy vehicle startup Nio has joined hands with Chinese solar giant Longi Green Energy Technology to promote the use of green energy from photovoltaic power generation in ...

On August 20th, NIO, together with various parties, completed the construction of the world's first V2G photovoltaic self-circulating energy replenishment system in Qilian Mountain ...

As for now, NIO has helped construct clean energy infrastructure and formulate clean and low-carbon energy circulation to protect the authenticity and integrity of ecosystems under the initiative.

Nio plans to use Longi's photovoltaic system on its 60 square meter battery swapping stations. These stations are currently under development and will be ready in some regions towards ...

Chinese electric vehicle (EV) manufacturer Nio has entered into a strategic cooperation agreement with Longi Green Energy Technology to incorporate the Chinese solar panel maker's ...

Nio (NYSE: NIO) has entered into a new partnership that could be paving the way for wider installation of solar panels on its signature battery swap stations.

Nio plans to equip its fourth-generation swap stations with 60 square meters of photovoltaic systems, which will save nearly 18,000 kWh of electricity per year per station, the report ...
