Norway has a unique opportunity to serve Europe with high quality, sustainable and ethically produced batteries, but we must act fast as other countries are building renewable energy capacity and ...

Last week marked a significant milestone for our company as we proudly received our inaugural Battery Energy Storage System (BESS) shipment in Norway, a nation known for its progressive stance ...

In November 2023, the developer Kyon Energy received approval to build a new large-scale battery storage project in the town of Alfeld in Lower Saxony, Germany.

Finland, Norway and Sweden have a substantial energy storage capacity of approximately 125 TWh, thanks to their large hydro reservoirs. To put the Nordic hydro storages into perspective, the energy ...

At its core, the Oslo Grid Energy Storage Project uses a BESS (Battery Energy Storage System) that could power 40,000 homes for 4 hours. But here's the kicker - it's not just about ...

Norway generates 98% of its electricity from hydropower, yet faces seasonal imbalances that new battery systems aim to solve. Oslo's manufacturers have developed cold-weather optimized storage ...

Whether for EVs or energy storage, Norway has always had ideal conditions for battery growth: renewable energy in the form of hydropower, strong government financial incentives for EV ...

Four years ago, Energi teamed up with ABB, Siemens, the Danish pension fund PKA and the Norwegian investment firm Nysn; to form Morrow Batteries.
