Following a lithium-ion battery fire at the Moss Landing plant in Monterey County in California, communities nationwide are expressing concerns about hosting similar plants.

The Lithium-ion Batteries in Containers Guidelines that have just been published seek to prevent the increasing risks that the transport of lithium-ion batteries by sea creates, providing suggestions for ...

As construction of extensive battery arrays continues unchecked, the absence of standardized safety measures highlights a glaring oversight in addressing potential fires. Local ...

Moss Landing, California's lithium-ion battery (LIB) storage facility, one of the largest in the world and part of the Moss Landing Power Plant, began burning on January 16, 2024.

The hazards and controls described below are important in facilities that manufacture lithium-ion batteries, items that include installation of lithium-ion batteries, energy storage facilities, and facilities ...

California's battery storage is in the news because of the Moss Landing fire. The real story is that batteries are making everyone in California healthier.

The fire raged through the weekend, forcing local officials to evacuate nearby homes and close roads. Battery storage is an essential part of the transition away from fossil fuels.

But as lithium-ion battery prices continue to fall and system safety improves, the technology could prove difficult to dislodge, at least in the energy storage industry, Woodward said.
