In terms of capabilities, we can say that Hungary has favorable opportunities, environmental energies - except hydropower and wind power - solar energy has great potential.

Solar meteorological data is analyzed methodologically using regression, time series analysis, and deep learning algorithms. The study demonstrates how well machine learning-based forecasting works to ...

PDF | On Sep 13, 2024, Ali Husam and others published PhD thesis Title of the thesis Power Quality and Stability Improvement, and Optimal Sizing of Bifacial Grid-Connected PV Systems by Using...

Design of Hybrid Photo-Voltaic/Thermal Solar Systems and Performance Analysis for Residential Building Case Studies. A Thesis submitted in partial fulfilment of the requirements for the award of ...

For the energy utilization in mining industry this thesis proposes a hybrid technique to recover the efficiency of solar photovoltaic (PV) energy system from the environmental impacts and ...

Investigations and contributions on the feasibility and forecasting of solar photovoltaic power generation in Romania

A Spatial Forecasting Model for Solar PV Generation and Its Application in Household Electricity Management Thanet Chitsuphaphan A thesis submitted for the degree of Doctor of Philosophy ...

To determine wind/solar resource energy potentials and their complementarity in Machakos for establishment of the local wind/solar characteristics and their viability in hybrid power system.
