EIA projects that PV's growth in 2023 (27 GWac) and 2024 (36 GWac) will continue in 2025 (39 GWac) and remain at similar levels in 2026 (36 GWac). In 2024, 24 states and territories ...

Solar Resource Maps and Data Find and download resource map images and data for North America, the contiguous United States, Canada, Mexico, and Central America. Solar Supply ...

The U.S. Solar Photovoltaic Database (USPVDB) provides the locations and array boundaries of U.S. front-of-the-meter, photovoltaic facilities, direct current capacity of 1 megawatt or more, that became ...

Welcome to the Global Solar Atlas. Start exploring solar potential by clicking on the map. Select sites, draw rectangles or polygons by clicking the respective map controls. Calculate energy production for ...

Project 2025, spearheaded by conservative think tank the Heritage Foundation with help from more than 100 other conservative groups, is a multi-part plan for the next conservative ...

The burgeoning global solar energy industry is the primary driving force, pushing up demand for PV brackets. Increasing government incentives and subsidies for renewable energy ...

The table below reflects statewide aggregated PV data provided to ISO New England by regional Distribution Owners and/or Transmission Owners. The values represent installed nameplate ...

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.
