BEBON is a high-tech enterprise specializing in the R& D, design, production and sales of distributed photovoltaic brackets, fixed photovoltaic brackets, flexible brackets and tracking brackets.

W-style photovoltaic brackets, with their distinctive "W" shape comprising three inclined supports, offer unparalleled stability, making them an ideal choice for regions with high winds.

Save construction materials, reduce construction cost, provide a basis for the reasonable design of PV power plant bracket, and also provide a reference for the structural design of fixed ...

Abstract: In order to study the mechanical properties of the fixed photovoltaic bracket and its failure under wind load, the full-scale photovoltaic bracket specimen was designed and the ...

The present invention relates to technical field of photovoltaic power generation, in particular it relates to a kind of photovoltaic bracket that may be disposed at container top.

The design of the photovoltaic bracket needs to be customized according to the size and shape of the solar panel to meet the installation requirements in different environments.

Based on the simplified bracket model, this article adopts the response surface method to lightweight design the main beam structure of the bracket, and analyzes and compares the bracket models ...

The Chinese utility model patent having a Granted Publication No. CN201620748693.7 provides a bracket structure for quickly fixing a photovoltaic module, which includes a photovoltaic module and a ...
