R& D, design, production, sales, and installation services for photovoltaic brackets and accessories (including ground bracket systems, roof bracket systems, and adjustable bracket systems)

This Solar Panel Mounting Hot Dip G.I. Structure 15x40x80x40x15 with 2 mm thickness specifically designed for 4 panels with a power range of 300-630W. This sturdy and durable structure is made ...

At Parco Engineers, we specialize in high-quality, hot dip galvanized (HDG) solar structures designed for durability and performance. This blog explores the various types of ...

To enhance their longevity and resistance to corrosion, our brackets undergo advanced surface treatment processes, including hot-dip galvanization and a galvanized aluminum-magnesium ...

PV mounting systems mainly consist of columns, main beams, purlins, welded components, and foundations. Commonly used materials for PV mounting systems include galvanized steel, aluminum ...

The use of hot-dip galvanizing in solar projects has significant advantages that make it one of the materials of choice for solar infrastructure construction.

Hot-dip galvanized photovoltaic (PV) mounting is a metal structural system designed to provide support for solar PV modules, with the steel surface treated against corrosion through the hot-dip galvanizing ...

Serves as the foundational anchoring point for solar photovoltaic (PV) support structures, securely connecting vertical posts or legs to ground-mounted foundations or rooftop attachment points.
