The present invention relates to a method for detecting and/or measuring the concentration of fluoride (F⁻) or hydrogen fluoride (HF) which is present in a sample and to a detection...

The rapid growth of the photovoltaic (PV) industry has brought immense benefits to renewable energy development. However, the disposal of end-of-life PV panels, particularly those ...

Based on the experiences of the aforementioned researchers and the summary of existing photovoltaic module defect detection methods, this paper proposes ST-YOLO, specifically designed for ...

Hydrogen fluoride, abbreviated HF, is a corrosive compound. The use of HF gas analyzers aids in monitoring the levels of this harmful substance in various industries. Colorless Gas. ...

This study presents the novel application of in situ tunable diode laser absorption spectroscopy (LAS) for highly time-resolved quantification of hydrogen fluoride (HF) emissions during ...

To objectively assess the effectiveness of our proposed method for photovoltaic panel defect detection, we conducted both quantitative and qualitative comparisons against established...

The deployment of solar photovoltaic (PV) panel systems, as renewable energy sources, has seen a rise recently. Consequently, it is imperative to implement efficient methods for the ...

First, it introduces the C2f-SCconv convolution module, which is based on SCconv convolution. This module reduces the computational burden of model parameters and improves ...
