The Portuguese government has initiated a public consultation for a hybrid project that includes a 339.4-MWp solar plant, a 14.4-MW wind farm, and a 310-MW/620-MWh battery energy ...

With solar farms sprawling across Alentejo and wind turbines dancing off the Atlantic coast, Portugal's secret sauce lies in its cutting-edge energy storage solutions.

Portugal's energy-storage market is entering a new stage of maturity, combining grid-scale standalone batteries and hybrid (co-located) systems with renewable plants.

Portugal has new green power plants under construction. Recently, the country published its intentions to increase energy production in Offshore Wind (10 GW by 2030), Green Hydrogen (that should ...

This study examines Portugal's electricity market outcomes in terms of prices, generation mix, and emissions for different wind and solar capacities, using the National Energy and Climate ...

The study analyzes how renewable energy penetration impacts storage requirements, determining the nominal hours of storage needed to maintain grid reliability, establishing minimum storage durations

The renewable energy landscape in Portugal is moving into a new phase, marked by stronger commitments from international investors and the integration of storage technologies into ...

We create simple, flexible, and competitive solutions for the energy or mobility needs of both large industries and small and medium-sized enterprises, as well as the individual consumer.
