One way to handle the issue is by implementing local energy systems called microgrids. This thesis proposes a projection concerning the development of the Swedish regulations and if the society of a ...

In this paper, a review of recent developments in rural electrification through micro-grids is presented. This work first lays the background on the challenges hindering the mass deployment of ...

**Key Insight:** Sweden's ambitious climate goals and bioenergy assets support rapid agricultural microgrid scaling.

The village of Simris, in southern Sweden was looking to locally produce renewable energy but needed a way to store and utilise the energy.

For this pilot project, the small village of Simris in the south of Sweden can be connected and disconnected from the main grid in a seamless way while being sourced by times solely by ...

In the rural town of Simris in the South of Sweden, E.ON, a large European utility company, has been testing the islanding of a 100 percent renewable microgrid.

In order to explore new business models and technologies to diversify the region's resource mix and reliance upon large-scale hydro resources, the large European utility E.ON deployed a microgrid in ...

At Comsys we made an interesting installation of a DC microgrid at a metal factory in a rural area of Sweden.
