Could a water-based power plant benefit Santo Domingo?
A water-based power plant could be one very valuable asset. Estrella del Mar III offers a host of benefits to the people of lively Santo Domingo, with a more reliable energy supply, reduced LCoE (levelized cost of electricity), and less noise--residential housing is close to the power plant.

Does Santo Domingo need a power plant?
The steady flow of electricity can support both tourism and Santo Domingo's innovative start-up scene. Nobel literature laureate Mario Vargas Llosa described the Dominican "appetite for noise" in his book The Feast of the Goat. A city that's already pulsating doesn't need any extra noise from a power plant.

How will the scc-800 2x1 floating power plant benefit the Dominican Republic?
We're excited that in the end, the SCC-800 2x1 floating power plant will bring clean and green electrical energy solution to benefit more people in the Dominican Republic," said Ng Sing Chan, President, Marine, ST Engineering. Seaboard Estrella del Mar III will be installed at the customer's location in the country's capital city Santo Domingo.

Does Seafloat have a combined cycle power plant in Santo Domingo?
The combined cycle power plant has arrived in Santo Domingo. While floating power stations have been around since the mid-90s, reinventing them with today's efficient, low environmental impact technologies is a first. SeaFloat does just that. And it's proving very popular.

Engineers have created a groundbreaking mobile floating combined cycle power plant with a self-supporting barge - now arriving in the Dominican Republic. The combined cycle power plant ...

This hybrid approach will combine high-efficiency power generation with advanced lithium-ion battery storage to maximise performance, improve fuel efficiency, and reduce emissions.

Due to site constraints with limited free land and their experience with previous power barges, the customer selected a SCC-800 2x1 SeaFloat concept with two Siemens SGT-800 gas ...

Based on its SeaFloat concept, this hybrid approach combines high-efficiency power generation with advanced lithium-ion battery storage to maximize performance, improve fuel ...

Based on its visionary SeaFloat concept, this hybrid approach combines high-efficiency power generation with advanced lithium-ion battery storage to maximise performance, improve fuel ...

The SeaFloat Estrella del Mar III will help meet Santo Domingo"s increasing demand for electricity and can support in case of power cuts - all without having to acquire precious land.

Among various battery technologies, Lithium Iron Phosphate (LiFePO4) batteries stand out as the ideal choice for telecom base station backup power due to their high safety, long lifespan, and excellent ...
