The HSH facility is aimed at augmenting and preserving the Bui reservoir by the generation of solar power when complete. This will be Ghana's first hybrid plant utilizing both solar and hydro resources ...

We're excited to announce that Higon Solar has successfully tested and pre-commissioned a 150kW hybrid solar system at a school in Ghana. This system includes a 150kW ...

Namkoo has successfully designed and installed an off grid solar energy storage system for a textile school in Accra, Ghana.

Our containerised energy storage system (BESS) is the perfect solution for large-scale energy storage projects. The energy storage containers can be used in the integration of various storage ...

This study presents a methodology for the optimal sizing and operation of photovoltaic (PV) and battery storage systems tailored to low-income schools in regions with frequent load ...

The system is located in Ghana at Tuna (lat. 9°18.28' N and long. 2°25'51.02' W) and serves a secondary school for enhanced quality education. The system relies on agro-waste (gasifier ...

The Ghanaian government has announced plans to roll out a solar energy initiative across all basic and senior high schools this year, aiming to provide reliable electricity and reduce ...

The KNUST Sustainable Energy Service Centre of the Department of Mechanical Engineering has developed two innovative institutional solar PV electric steam cooking technologies ...
