In a landmark move toward sustainable energy, Eritrea is set to welcome its first solar photovoltaic energy storage plant, marking a significant step in the nation's renewable energy journey.

The project will involve the establishment of solar PV plants, supported by battery energy storage systems (BESS) and backup diesel generators, to improve electricity reliability.

Trina Storage, the global energy storage business launched by Trina Solar earlier this year, will unveil a new, utility-scale smart energy storage system that cuts CAPEX by over 5% at Intersolar Europe.

This product is designed as the movable container, with its own energy storage system, compatible with photovoltaic and utility power, widely applicable to temporary power use, island application, ...

Eritrea's Ministry of Energy and Mines has awarded China Energy Engineering Shanxi Electric Power Construction a EUR29.3 million (US\$31.9 million) contract to build the 30MW Dekemhare solar ...

Discover how Eritrea's innovative phase change energy storage solutions are reshaping sustainable development and creating opportunities for global partnerships.

A project developer from China has been selected to construct the first solar PV energy storage plant in Eritrea. The African Development Bank (AfDB) funded project will be made up of a ...

Located near the town of Dekemhare, approximately 40km southeast of the capital, Asmara, the ambitious project encompasses a 30MW solar photovoltaic power station coupled with a ...
