This clean, renewable source promises to play an increasingly vital role in North Macedonia's energy mix, propelling us towards a horizon powered by the steady and reliable force of the wind.

A city where 19th-century coal plants shake hands with 21st-century energy storage tech. That's Skopje today - a Balkan hub rewriting the rules of coal-to-electricity energy storage.

Through its municipal energy company, GES Skopje, the city is also participating in the Power Up! project, devised and coordinated by Energy Cities. In order to fight energy poverty among its citizens, ...

North Macedonia remains heavily reliant on coal, with over 60% of its electricity generated from this fossil fuel. This dependence has significantly contributed to severe air pollution, ...

a country where sunny days and gusty winds aren't just weather forecasts--they're blueprints for a cleaner energy grid. That's exactly what North Macedonia is aiming for with the ...

A city where sudden power outages become as rare as unicorn sightings, and solar panels work overtime even after sunset. That's the promise of the Skopje Energy Storage Project - ...

You know how people say renewable energy is unreliable? Well, North Macedonia's Skopje Pumped Storage Power Station just proved them wrong. Operational since Q2 2024, this EUR1.2 billion marvel ...

Fleets of vehicles, buses running on biofuels, bio-diesel, CNG (Compressed Natural Gas), methane and electricity will run during the project. Strong efforts will also be put into getting a well functioning ...
