Romanian transmission system operator Transelectrica has announced a tender for a battery energy storage project with a 35MW power output and 70 MWh storage capacity. [pdf]

AES Bulgaria will explore options for developing a combined 100 MW solar power and battery energy storage project, as well as a standalone 80 MW battery storage project near the capital Sofia to ...

The Ministry of Energy in Sofia has introduced the RESTORE public call for Energy storage facilities, inviting public consultation on the draft framework. The public debate is set to last for one month, ...

In this paper, an optimization method for energy storage is proposed to solve the energy storage configuration problem in new energy stations throughout battery entire life cycle.

On June 2, it was reported that International Power Supply (IPS) is set to begin operations at its new battery energy storage systems (BESS) manufacturing facility near Sofia, Bulgaria.

A battery energy storage system (BESS) is an electrochemical device that charges (or collects energy) from the grid or a power plant and then discharges that energy at a later time to provide electricity or ...

That's where the Sofia Energy Storage Projects come in - they're basically the Swiss Army knives of the renewable energy world. These grid-scale battery systems are solving one of the ...

It adopts high-safety lithium iron phosphate batteries and is equipped with the province's first integrated system of 'new energy + energy storage + digital management and control', with a charge-discharge ...
