As jurisdictions around the world initiate or revise distributed photovoltaic (DPV) policies and regulations amid changing market conditions, they may benefit from understanding the interaction of ...

Quarterly detail of state and utility distributed solar policy and rate design changes. 37 states and DC have mandatory net metering rules. 8 states have other DG compensation rules. Net Metering - ...

State Solar Carve-Out ProgramsSolar Interconnection Standards & PoliciesUnderstanding Electricity Market Frameworks & PoliciesInterconnection standards define how a distributed generation system, such as solar photovoltaics (PVs), can connect to the grid. In some areas of the United States, the interconnection process lacks consistent parameters and procedures for connecting to the grid or is unnecessarily complex. This drives up costs and causes delays, which can be sign...See more on epa.gov.
Pacific Northwest National Laboratory[PDF]Distributed Generation Valuation and CompensationThe law states that an electric company shall credit an owner of or subscriber to a community solar project in a manner that reflects the resource value of solar energy, to be determined by the Oregon ...

Section 2: S-SFA Compensation Level Schedules ar PV, paired solar-storage, and energy storage projects for the 2026 S-SFA program year (running from December 1, 2025 to ...

As more homes incorporate solar PV, electric utilities and state utility commissions continually evaluate ways to equitably compensate solar PV system owners for generation. Changing compensation rates ...

State and local policies and regulations have encouraged greater solar PV deployment in their jurisdictions. Examples include financial incentives (e.g., tax credits, rebates), renewable portfolio ...

Excess generation credits can typically be carried over from one billing cycle to another until they reach the settlement period: i.e. the point at which any net excess generation credits (or compensation ...
