Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.

For lead-acid batteries, frequent full charges are indeed important to prevent sulfation. However, applying this same rule to all battery types, particularly LiFePO<sub>4</sub>, can be ...

Solar energy must be stored for use after sunset or during cloudy days. Lithium Iron Phosphate (LiFePO<sub>4</sub>) batteries provide long life, superior safety, and deep discharge capability. ...

A solar power container is a self-contained, portable energy generation system housed within a standardized shipping container or custom enclosure. These turnkey solutions integrate ...

Among the innovative solutions paving the way forward, solar energy containers stand out as a beacon of off-grid power excellence. In this comprehensive guide, we delve into the ...

This ambitious endeavor transforms a standard 20-foot shipping container into a high-capacity, modular, and off-grid power system capable of supporting diverse energy needs.

We combine high energy density batteries, power conversion and control systems in an upgraded shipping container package. Lithium batteries are CATL brand, whose LFP chemistry packs 1 MWh ...

We'll break down SOC vs. voltage, fix charging issues, and share pro tips to keep your LiFePO<sub>4</sub> or lead-acid battery in top shape. Plus, we've got charts and a handy formula to make it crystal clear.
