Is solar energy a green energy source in Italy?

After hydroelectric power, solar energy is the star performer of our green energy sources. Photovoltaic energy, in particular, accounts for approximately a quarter of the total green energy produced in Italy (2023 data). The most important years so far for solar energy on a national level have been the early years of this century.

What are the different types of solar energy production in Italy?

Photovoltaic (PV) Systems: The majority of solar energy production in Italy comes from PV systems, both rooftop and utility-scale installations. Concentrated Solar Power (CSP): While less common, CSP technologies are also being explored in regions with high solar irradiation.

How much solar power does Italy have in 2024?

In 2024, Italy achieved its strongest year of solar growth in over a decade, installing 6.7 GW of new photovoltaic (PV) capacity and bringing cumulative capacity to 37 GW. PV generation reached 36 TWh, covering about 11.5 % of national electricity consumption.

What is Italy's potential for solar energy?

Italy has substantial untapped potential for solar energy. According to IRENA, the country could increase its solar capacity by more than 50% over the next decade, reaching up to 40 GW by 2030. This potential is driven by advancements in technology and the growing acceptance of solar energy among consumers.

Italy Solar Energy Market, valued at USD 18 billion, shows robust growth from rooftop PV and incentives, with Solar PV dominating and residential end-users leading adoption.

Discover the leading solar companies in Italy for 2025. Explore Enel, Futura, Grace Solar and other top players shaping Italy's renewable energy future with innovative technologies and solutions.

In 2024, Italy achieved its strongest year of solar growth in over a decade, installing 6.7 GW of new photovoltaic (PV) capacity and bringing cumulative capacity to 37 GW. PV generation reached 36 ...

The press release highlights a structural shift in Italy's energy landscape, with solar power becoming integral to the national energy mix. The surge in installations reflects growing ...

Photovoltaic energy, in particular, accounts for approximately a quarter of the total green energy produced in Italy (2023 data). The most important years so far for solar energy on a national ...

Italy's photovoltaic market is soaring past 40 GW in 2024. Discover the key drivers, government incentives, and future outlook for solar installations in Europe's second-largest market.

Find the most up-to-date statistics about the solar photovoltaic industry in Italy

By technology, photovoltaic systems held 99.97% of Italy's solar energy market share in 2025; concentrated solar power is forecast to expand at a 104.7% CAGR through 2031.
