Why is the global solar (PV) inverter market expanding?

The global solar (PV) inverter market is expanding due to rapid expansion of the renewable energy sector. The growing demand and need for green and clean energy are driving the growth and development of global solar (PV) inverter market over the projected period.

How competitive is the market for PV inverters?

The market for PV inverters is highly competitive and moderately fragmented due to the presence of numerous market players. The dominant trend in operations of these solar companies includes vertical integration, which defends against market power and reduces competition.

What is the global solar inverter market size?

The global solar inverter market size was exhibited at USD 10.34 billion in 2023 and is projected to hit around USD 22.95 billion by 2033, growing at a CAGR of 8.3% during the forecast period of 2024 to 2033. Asia-Pacific accounted for the largest revenue share of around 44% in 2023.

What drives the demand for solar (PV) inverter in the global market?

As a result, all these factors are driving the demand for solar (PV) inverter in the global market. The most significant driver of the solar inverter market is the global push towards renewable energy sources to combat climate change and reduce dependence on fossil fuels.

Companies are launching modern PV inverters, especially smart or grid-tied inverters, that offer advanced functionalities such as voltage regulation, frequency support, and remote monitoring, ...

Comprehensive analysis of the Solar PV Inverters Market from 2025 to 2035. Covers key trends, product insights, competitive landscape, pricing forecasts, sustainability impact, and future ...

Market growth is supported by the accelerating adoption of photovoltaic systems and continuous advancements in inverter technologies. More than 45% of new solar installations now ...

Compare market size and growth of Solar PV Inverters Market with other markets in Energy & Power Industry

PV Inverter Market Forecast and Outlook from 2025 to 2035 The PV inverter generators industry is valued at USD 1.7 billion in 2025. As per FMI's analysis, the PV inverter will grow at a ...

Solar inverters are essential in enhancing the performance and reliability of sun structures, making renewable strength more sensible and effective for residential and business ...

Asia-Pacific accounted for the largest revenue share of around 44% in 2023. The central inverter segment dominated the market with a share of 50% in 2023. In 2023, the on-grid segment dominated ...

The constant economic growth in nations such as the U.S., China, and India as well as developments in supply chain and favorable government policies supporting PV inverter production in the U.S. and ...
