How much does a solar panel installation cost?

One of the biggest cost factors for your solar panel installation is the size of the system you have installed. System size is measured in kilowatts (kW) and is determined by household energy consumption. The average cost per watt is \$3.04, but larger systems often have a lower cost per watt.

How much does solar cost per square foot?

Average U.S. solar cost per square foot in 2025: \$6 - \$12 after the 30% federal tax credit. Cost per square foot varies by system size, energy use, location, and panel efficiency. The most accurate pricing metric is still cost per watt, but per-sq-ft estimates are helpful for ballpark figures.

How much does a rooftop solar system cost?

Mounting system: This is what holds rooftop solar panels in place. Costs vary depending on the type of solar installation, but it generally costs between 7 and 20 cents per watt. Electrical wiring and hardware: This includes the wiring, switches and circuit breakers required to connect the solar panel system to your home's electrical system.

How much does a solar system cost in 2026?

Most homeowners spend between \$12,600 and \$33,376 to install a complete residential solar system in 2026, with the national average at \$19,873 before incentives. Your actual cost depends on your home's energy needs, roof characteristics, location and other factors, all of which we'll break down in this guide.

In comparison, residential solar panel installation costs \$2.53 to \$3.15 per watt. A 1-megawatt solar farm can power 100 to 250 homes, depending on the location and climate. Get free ...

This guide breaks down the key factors affecting photovoltaic solar panel unit prices, explores global market trends, and reveals how to maximize your ROI. Whether you're a homeowner, business ...

The U.S. Department of Energy's solar office and its national laboratory partners analyze cost data for U.S. solar photovoltaic systems to develop cost benchmarks to measure progress towards goals and ...

Solar panels can lower your electricity bill by 75% or more, but the upfront investment is significant. Most homeowners spend between \$12,600 and \$33,376 to install a complete residential...

On average, solar systems cost about \$3.04 per watt, though larger systems often have a lower cost per watt. You can use the table below to estimate total costs based on different system ...
